DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

There are three species of blades. Applicant must elect a blade as shown in figure 1, 24, or 25. For all three blade elections, applicant must additionally elect a species of blade tip shown as figure 23a, 23b, or 23c.

Applicant must additionally elect one of the three drive mechanisms: drive belt, drive wheel, or drive tube. If applicant elects the drive belt, applicant must additionally elect a species of drive belt as shown in figure 29, 30, or 33. Additionally, for all drive belt elections, the applicant must also elect a cross-section shape shown in figure 31, 32, or 33. If applicant elects the drive wheel, applicant must elect a species of drive wheel as shown in figure 9, 26, or 27. If applicant elects the drive tube, applicant must elect one of the six species of drive tubes shown in figures 35-40.

An example of proper election would be blade 24, blade tip 23a, drive belt 30, and subspecies of drive belt 32. Another example of a proper election would be blade 1, blade tip 23b, and drive tube 37. For all elections applicant must recite all the claims that read upon the elected species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none appear generic.

Art Unit: 3731

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to James Sheridan on May 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3731

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
